

Assignment 1

EDA + Clustering + Feature Engineering + ML + Model Evaluation

Tasks

- EDA report with interpretation
- Do unsupervised clusters align with the supervised labels?
- Compare different ML algorithms
- Compare models with raw features and with engineered features
- Detailed model evaluation

Project 1

Predict whether annual income of an individual exceeds \$50K/yr based on census data.

[Adult dataset](#)

Project 2

Predict diabetes risk based on generated patient profiles.

[Diabetes Health Indicators dataset](#)

Project 3

Predict the level of problematic internet usage, based on physical activity data.

[Child Mind Institute – Problematic Internet Use competition](#)
