

Assignment 2

Time Series + ML + Deep Learning

Tasks

- Time series analysis
- Classical forecasting
- Forecasting with ML (possibly also deep learning)
- Detailed model evaluation

Project 1

Forecast store sales on data from Corporación Favorita, a large Ecuadorian-based grocery retailer.

[Store Sales – Time Series Forecasting competition](#)

Project 2

Forecast the unit sales (point forecasts and uncertainty distribution) of various products sold in the USA by Walmart.

M5 Forecasting – Accuracy competition

M5 Forecasting – Uncertainty competition

Project 3

Predict whether or not some turbofan engines are going to break down within the next 100 cycles.

[Predictive Maintenance competition](#)
